

CCT-4 Series
Small size
mV Output, Uncompensated
Voltage Supply
ROHS & REACH Compliant

DESCRIPTION

Advanced Sensors Ceramic Castellation Technology (CCT) 4 Series contains a piezo resistive sensor element that delivers a high level mV output in a low cost, small footprint, leadless castellation package. This low profile sensor is available in narrow hole, single tube, and wide hole with gel to ensure isolation from the pressure media. The closed bridge sensor delivers a stable mV output in absolute and gage pressures in both psi and inH2O ranges. The sensor high input impedance and wide supply voltage allow the sensor to be used in low power battery applications. The CCT-4 series small leadless package, many port configurations make it the best low cost sensor for OEM customers.

Reference Conditions: Vsupply: 5.00Vdc, Ta=25 $^{\circ}$ C.

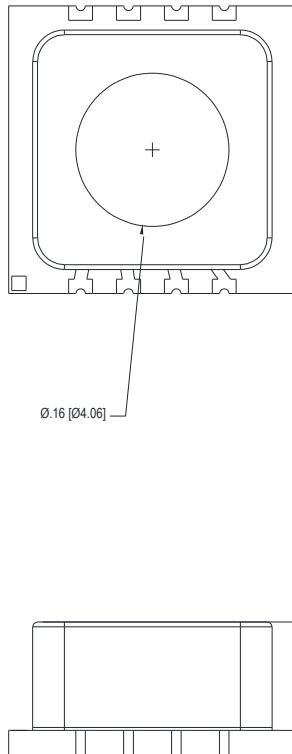

1. All specification at reference conditions unless otherwise noted. Output is ratio metric to supply voltage.
2. $\frac{1}{2}$ Terminal Base Non Linearity (Measured at 0, 50% and 100% FS).
3. Deviation between 70 $^{\circ}$ C and 0 $^{\circ}$ C expressed as percentage of reading at 25 $^{\circ}$ C.
4. Deviation after 1 year period measured at reference conditions.
5. Measured over the temperature range of 70 $^{\circ}$ C and 0 $^{\circ}$ C.
6. Exceeding Absolute Maximum Specification may damage the device. Extended exposure beyond the operating conditions may affect device reliability.
